

Ecological Justice – helpful graphics

The Bystroff model figure 4 was published in 2021. The bottom line represents business as usual, the top line might be achievable if we attempt to release 50% of the biocapacity of Earth.

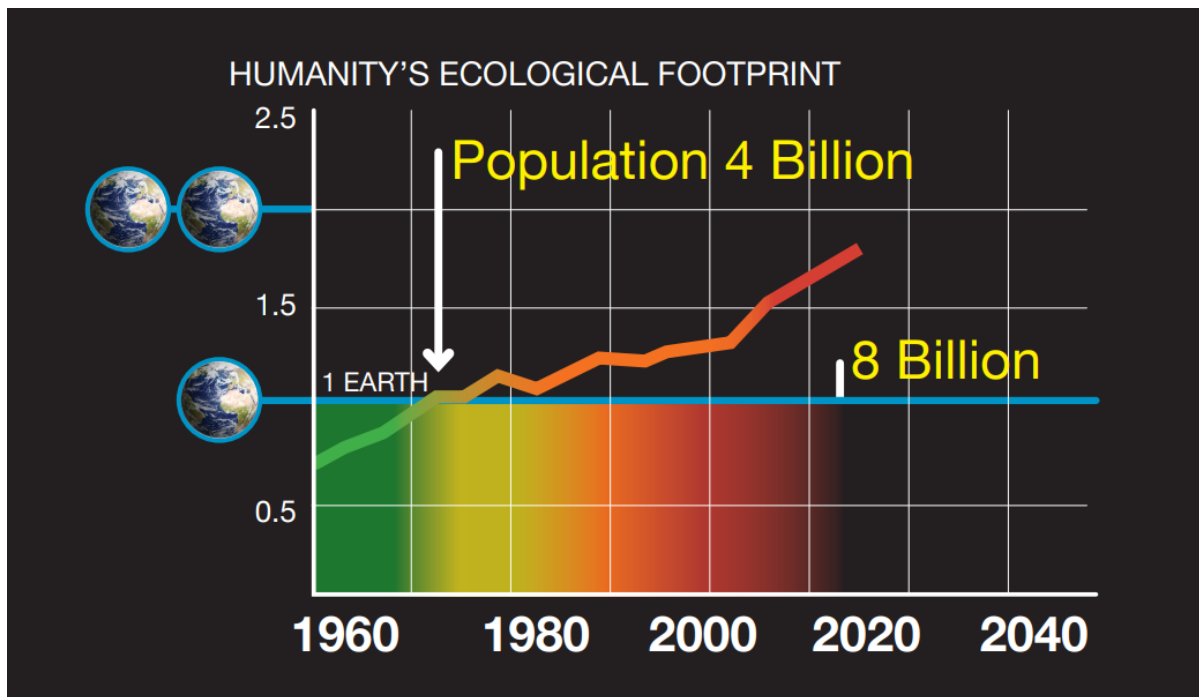

The graphic below from the [Roadmap to Ecological Justice](#) shows the importance of average ecological footprint and the combined problems of overpopulation and overconsumption.

Data From the Global Footprint Network, relates to 2018
All figures are in billions

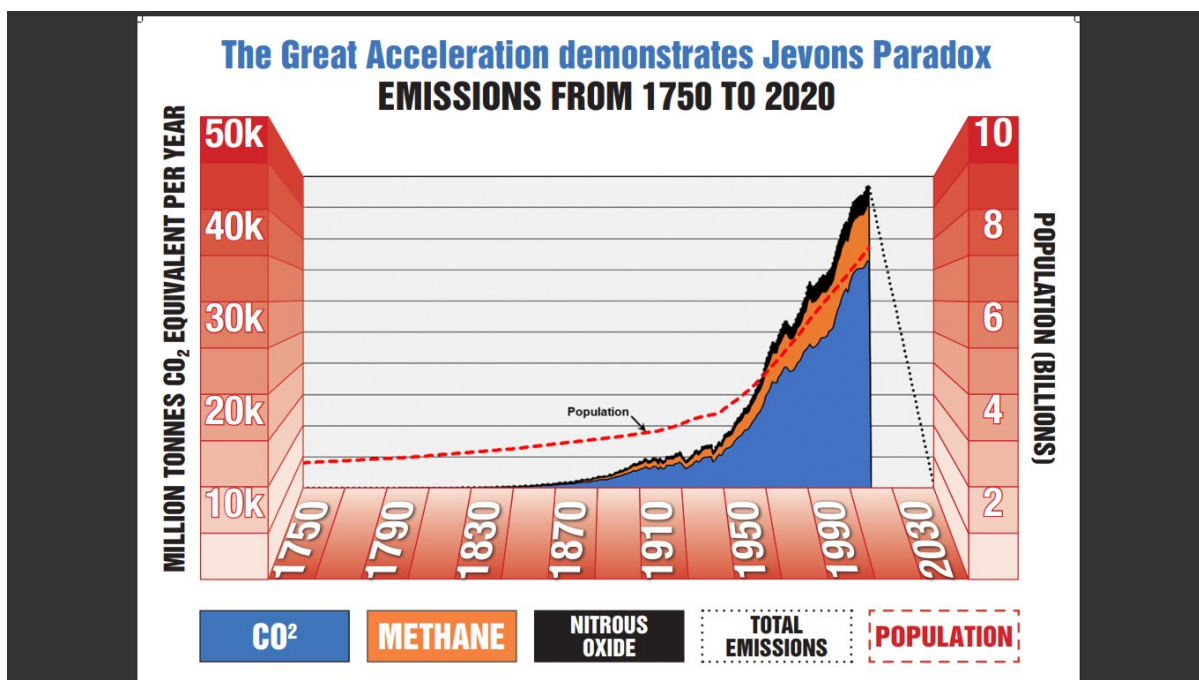

Ecological Justice – helpful graphics

Other helpful graphics that need to become common knowledge, the one below shows ecological overshoot and population size:

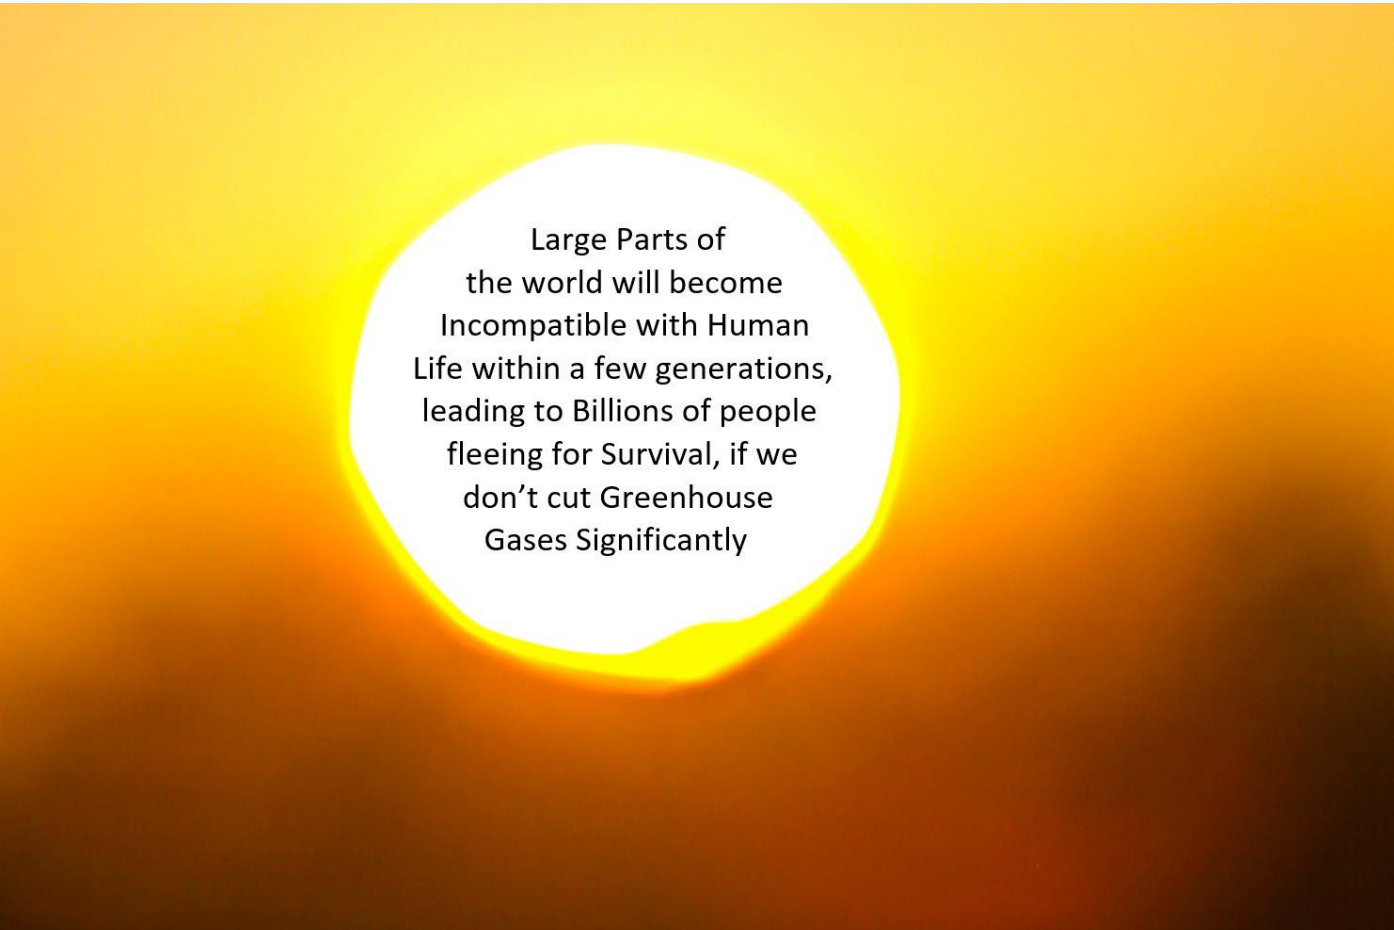

Understanding that we are up against the Jevons paradox is important to help us fully grasp the unrealistic nature of our current net-zero plans. The graphic below, or similar should help us to develop a more realistic strategy:

“Anyone who believes in indefinite growth on a physically finite planet is either mad, or an economist.”

— David Attenborough

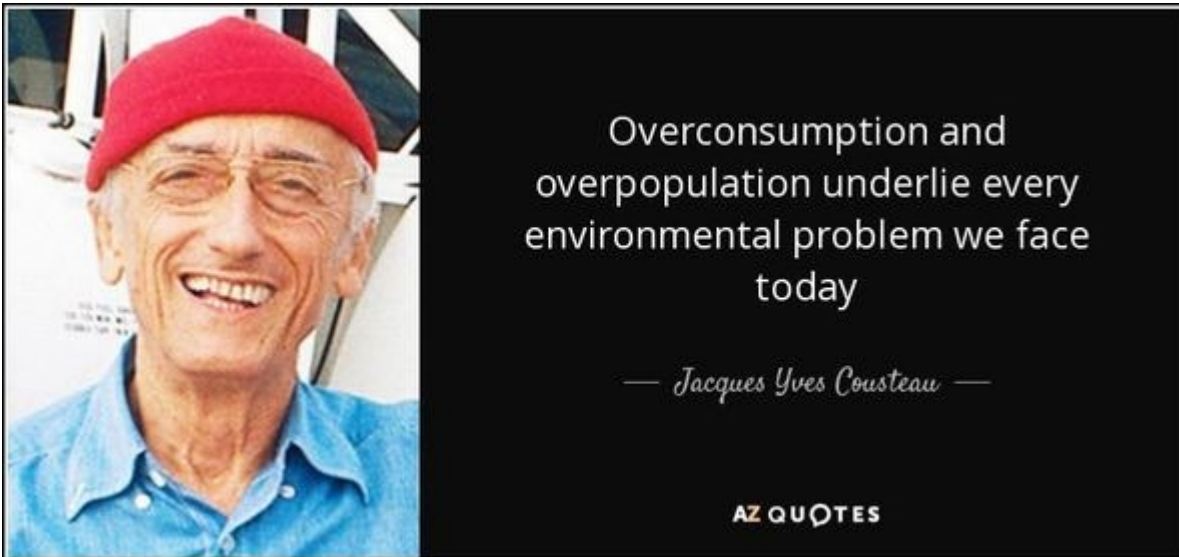

Large Parts of
the world will become
Incompatible with Human
Life within a few generations,
leading to Billions of people
fleeing for Survival, if we
don't cut Greenhouse
Gases Significantly

**To acquire the Degrowth Mindset, you need to forget
making a profit then spend your Capital before it becomes
worthless on the global priorities below:**

- a) reversing the influence of coercive consumer culture**
- b) enhancing education relating to family planning**
- c) empowerment for everyone to be able to choose
the size of their families without cultural pressures to
procreate in the face of ecological collapse**
- d) eco-restoration and regeneration.**

Anxiety is necessary to trigger motivation

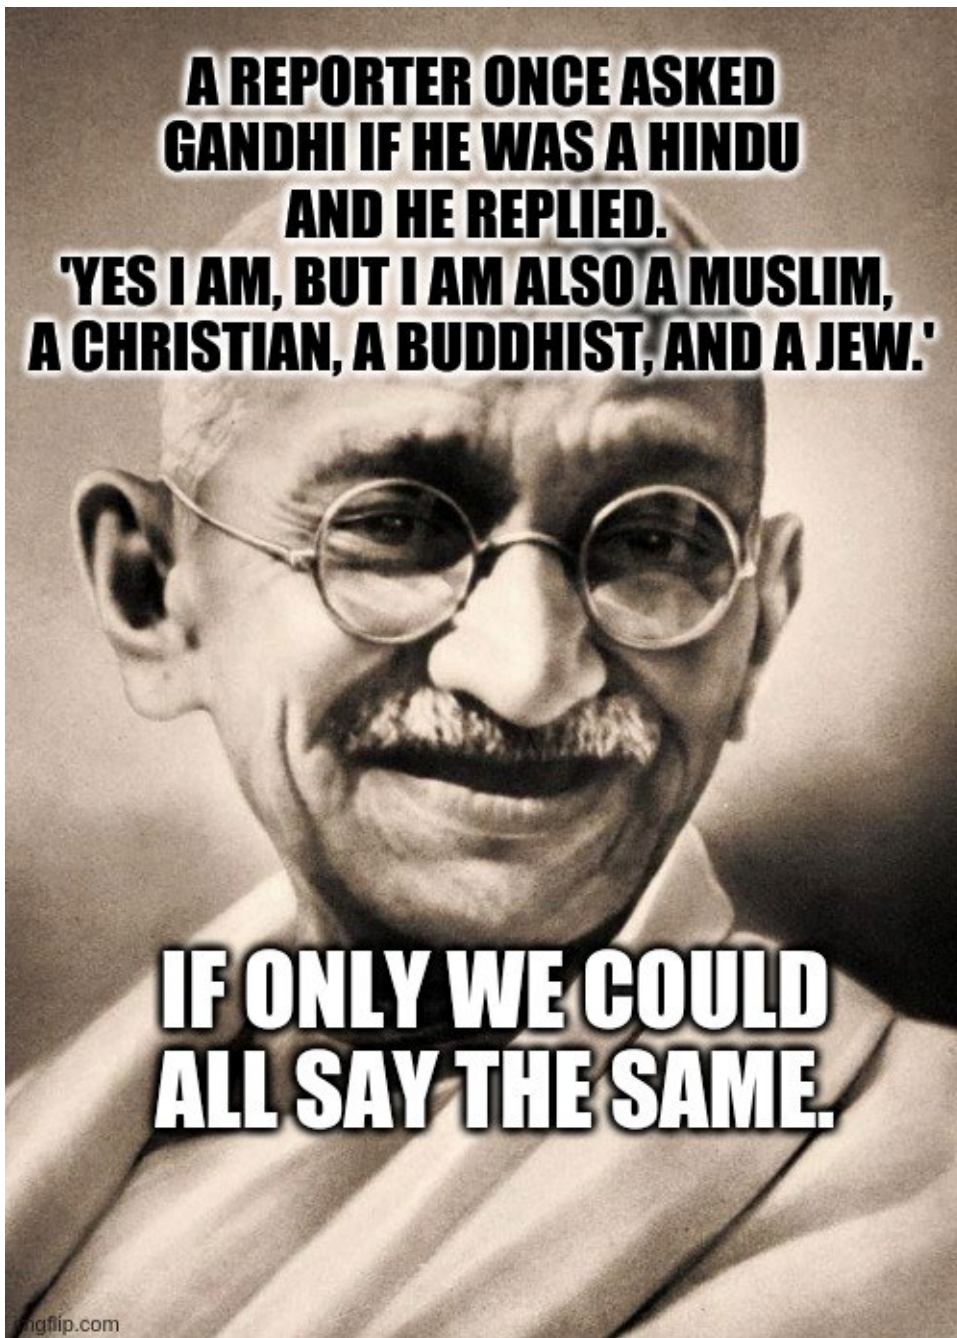

“Here’s your problem—it looks like you’re paying attention to what’s going on.”

“ All our environmental problems become easier to solve with fewer people, and harder - and ultimately impossible - to solve with ever more people. ”

- Sir David Attenborough, Population Matters Patron

Interconnectedness is key

Ecological Justice – helpful graphics

We urgently need to encourage people to become aware and take responsibility for the outcomes of our collective actions and decisions. Many of our problems lie in our [pedagogy](#) and media.
